

Arturo Chiti

- EANM during my presidency?

A unique and unforgettable experience. We changed the Association's structure and prepared it for new challenges. The impressive amount of work we have done created strong links between board members and the new office staff. I got married during my presidency, which is a unique performance so far.

- EANM now and in the future?

The Association has the strength and capacities to keep its leadership position and enhance its influence in the scientific world. The EANM represents the prominent place where signs of progress from all over the world are meant. In the future, brilliant colleagues will keep the leadership that we reached in recent years. EANM also benefits from a healthy family of Journals, led by the EJNMMI, to spread its influence.

- What is EANM for me?

A strong community where I find myself comfortable. I got my membership during my nuclear medicine training, and I spent many years in the EANM, collecting friends and good memories. EANM was - and is - for me a unique experience, from a professional and personal point of view.
