10:05 – 10:15	Discussion with the audience and Q&A

Summary

The EU4Health Joint Action AURORad (Advancing Unified Roadmap on implementation of the Strategic Agenda for Medical Ionising Radiation Applications) is a new initiative supporting the implementation of the European Commission's SAMIRA Action Plan. This session will introduce the Joint Action and the objectives of the Radiopharmaceutical Therapy work package, followed by presentations on its three key topics: regulatory training and convergence, reimbursement of dosimetry procedures, and patient release criteria. As the project is in its early stages, the session will also provide an opportunity for the audience to share perspectives and contribute ideas to help shape its future activities and outputs.
